

# Today's Presentation

## ***Agenda***

What is SAP MM ?

What Are SAP MM Jobs ?

What will you benefit from Studying MM?

ERP Overview

SAP History and Modules And Servers

SAP Implementation Methodology

SAP Organization Structure

Data type in SAP

SAP Master Data

SAP LOGIN

Material Master Data

# What is SAP MM ?

SAP **M**aterial **M**anagement

نظام إدارة المواد  
في الشركة

# What is Material Management ?

Material Management Manages All Supply Chain Processes From Material Demanding To Material Receiving in The Company Warehouses, including Material invoicement And Material issue To Customer Too.

# What is Supply Chain Management ?

Supply Chain manages All Procurement Processes For The following jobs:

- 1- Stock Controller Or Material Planner Or Material Controller Department
- 2- contracting Department
- 3- Purchasing Department
- 4- inventory Department

# What will you benefit from Studying MM?

You Will Be Able To Manage And Support All MM Cycles From PR To Payment And Can Be Consultant To Make Functional MM Configuration To SAP System For MM End Users

# INTRODUCTION ERP SYSTEM

SAP = ERP

What is ERP?

Enterprise Resources Planning  
نظام تخطيط موارد المؤسسة

نبذة مختصرة عن  
**ERP SYSTEM**  
نظام تخطيط  
موارد المؤسسة

# Supply Chain Departments And Tasks

**Warehouses**

**Make Good Receipt –  
Good issue For  
Materials To Production  
Line Or Customers**

**Purchasing**

**Create Purchase Order  
And Send it To Vendor  
And Follow Vendor Until  
Supplying Materials**

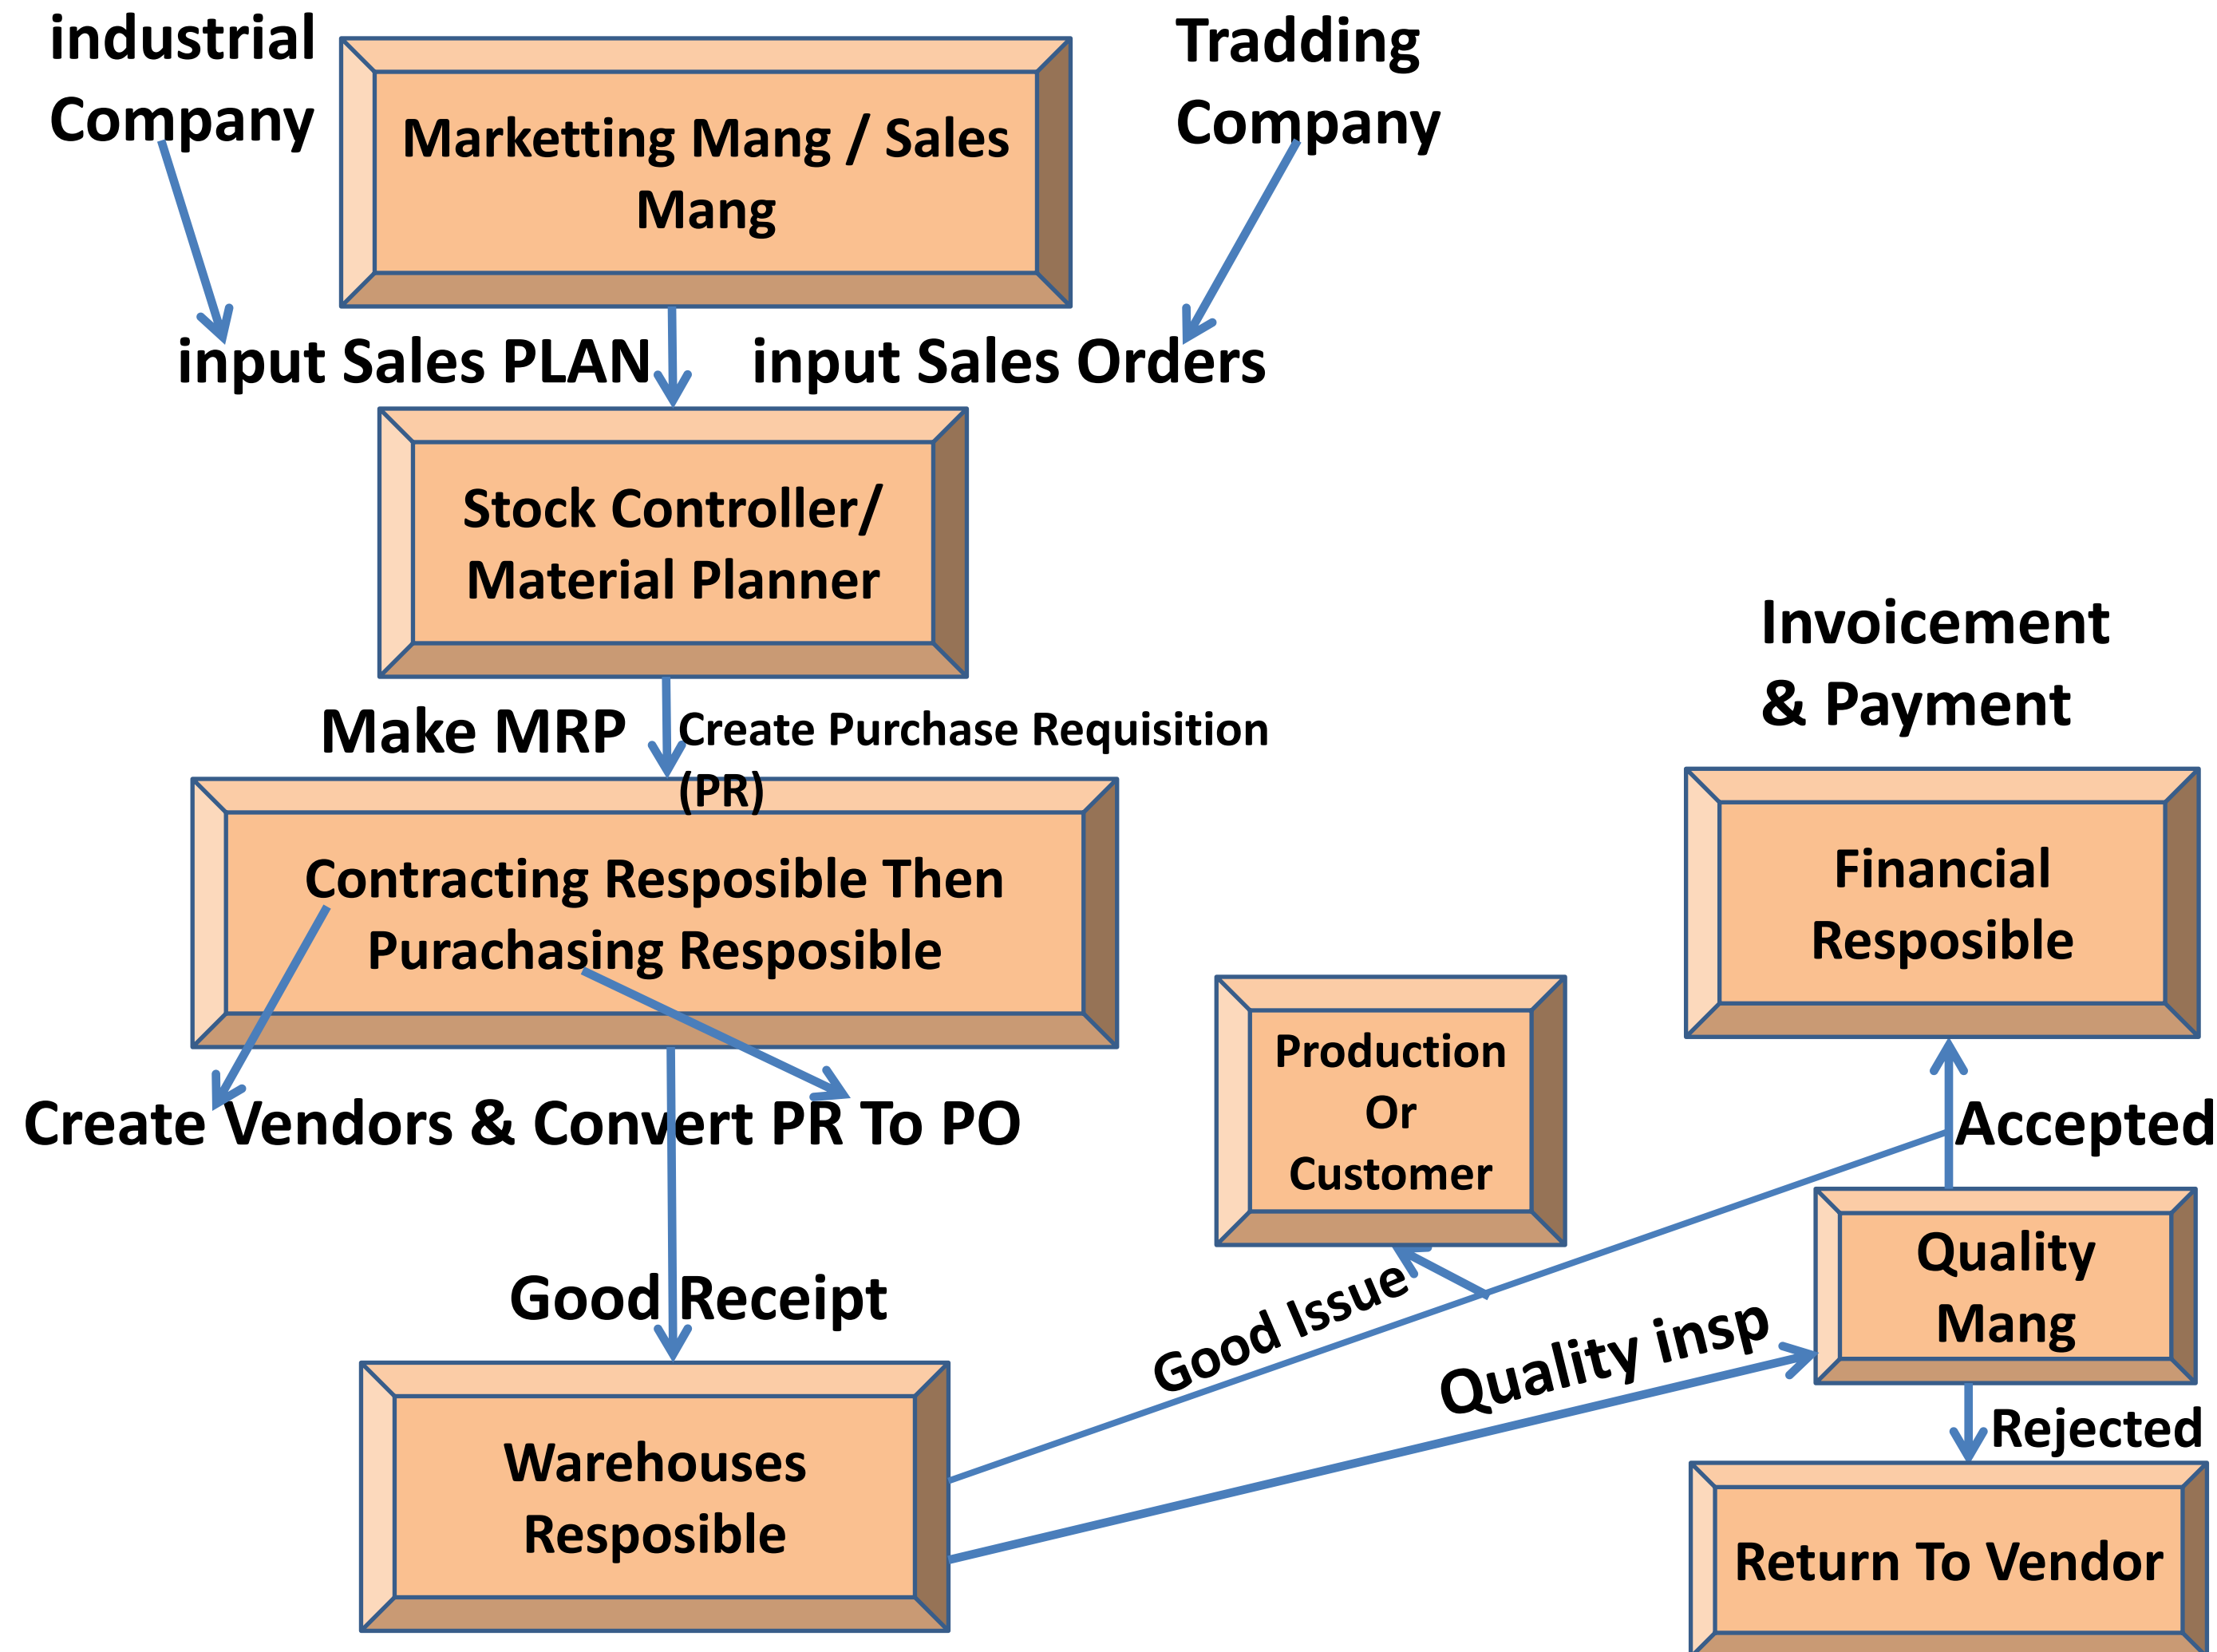

**Contracting**

**Search For New  
Vendors For Materials  
– Create Agreements  
With Vendors**

**Stock Controller**

**Material  
Demanding –  
Create Purchase  
Requisition**

# ERP Steps For Materials Requirement

# What and Why ERP?

- Enterprise resource planning ([ERP](#)) systems are used by organizations looking to manage their business functions within a centralized and integrated system.
- ERP is commonly used by companies working within the supply chain to help keep track of all the moving parts of manufacturing and distribution
- ERP stores all entered data into a single database, allowing all departments to work with the same information

## Why ERP ?

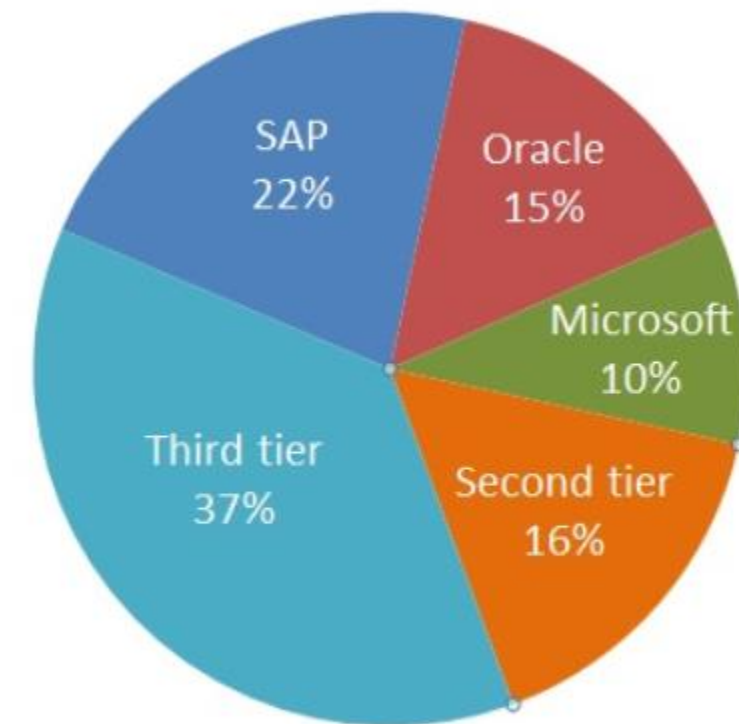

- 1) Improved Collaboration
- 2) Better Analytics
- 3) Improved productivity
- 4) Customer Satisfaction
- 5) Improved Inventory Monitoring

# Some of ERP Products:

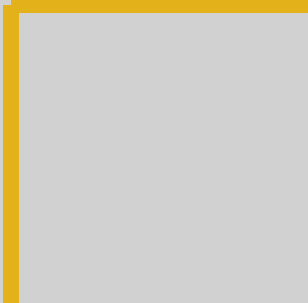

- **SAP** (1972-German)
- **Oracle** (1977-Multi National)
- **People Soft** (1987-American)
- **D Edwards** (1977-American)

## ERP MARKET SHARE

Source: <http://www.businesssoftware.com/erp-market-share/#:~:text=The%20first%20tier%20is%20the,about%2015%25%20of%20the%20market.>

# INTRODUCTION To SAP IN GENERAL

SAP Meaning **S**ystem **A**pplications and  
**P**roducts in data processing”

SAP was founded in **1972**  
by five former IBM  
employees in Mannheim,  
Germany  
SAP “**S**ystem **A**pplications and  
**P**roducts in data processing”

*Dietmar Hopp, Hans-Werner, Hector Hasso Plattner Klaus Tschira, Claus Wellenreuther  
1972*

# SAP Customer References

# SAP Customer References in Egypt

# SAP Customer References in Egypt

- Amer Group

- Misr October for Food Industry (ENJOY)
- Multipharma Company
- Alexandria for Food (FARAGALLAH)
- Carrier
- MCV
- Metra Computer
- ABB
- Kapci

# SAP Versions

## SAP Ariba

This is the most advanced procurement suite by SAP. It covers all processes from Source-to-Pay.

- + Cloud-based
- + Standard out-of-the-box content
- + Easy to use
- + One platform incl. Ariba Network

## SAP S/4HANA

S/4HANA is SAP's next generation ERP business suite with Sourcing & Procurement.

- + Cloud or On-Premise
- + Procurement processes in ERP
- + Easy to use with SAP Fiori
- + In-memory platform

## SAP ECC SAP SRM

Previous generation e-Procurement solution. It supports all Operational and Strategic Procurement processes.

- SAP supported until 2025
- No innovations
- Less easy to use
- + Many improvements possible

## SAP ECC SAP MM

This is the procurement module within SAP ECC. It supports all operational Procurement Processes.

- SAP supported until 2025
- No innovations
- Not easy to use
- + Many improvements possible

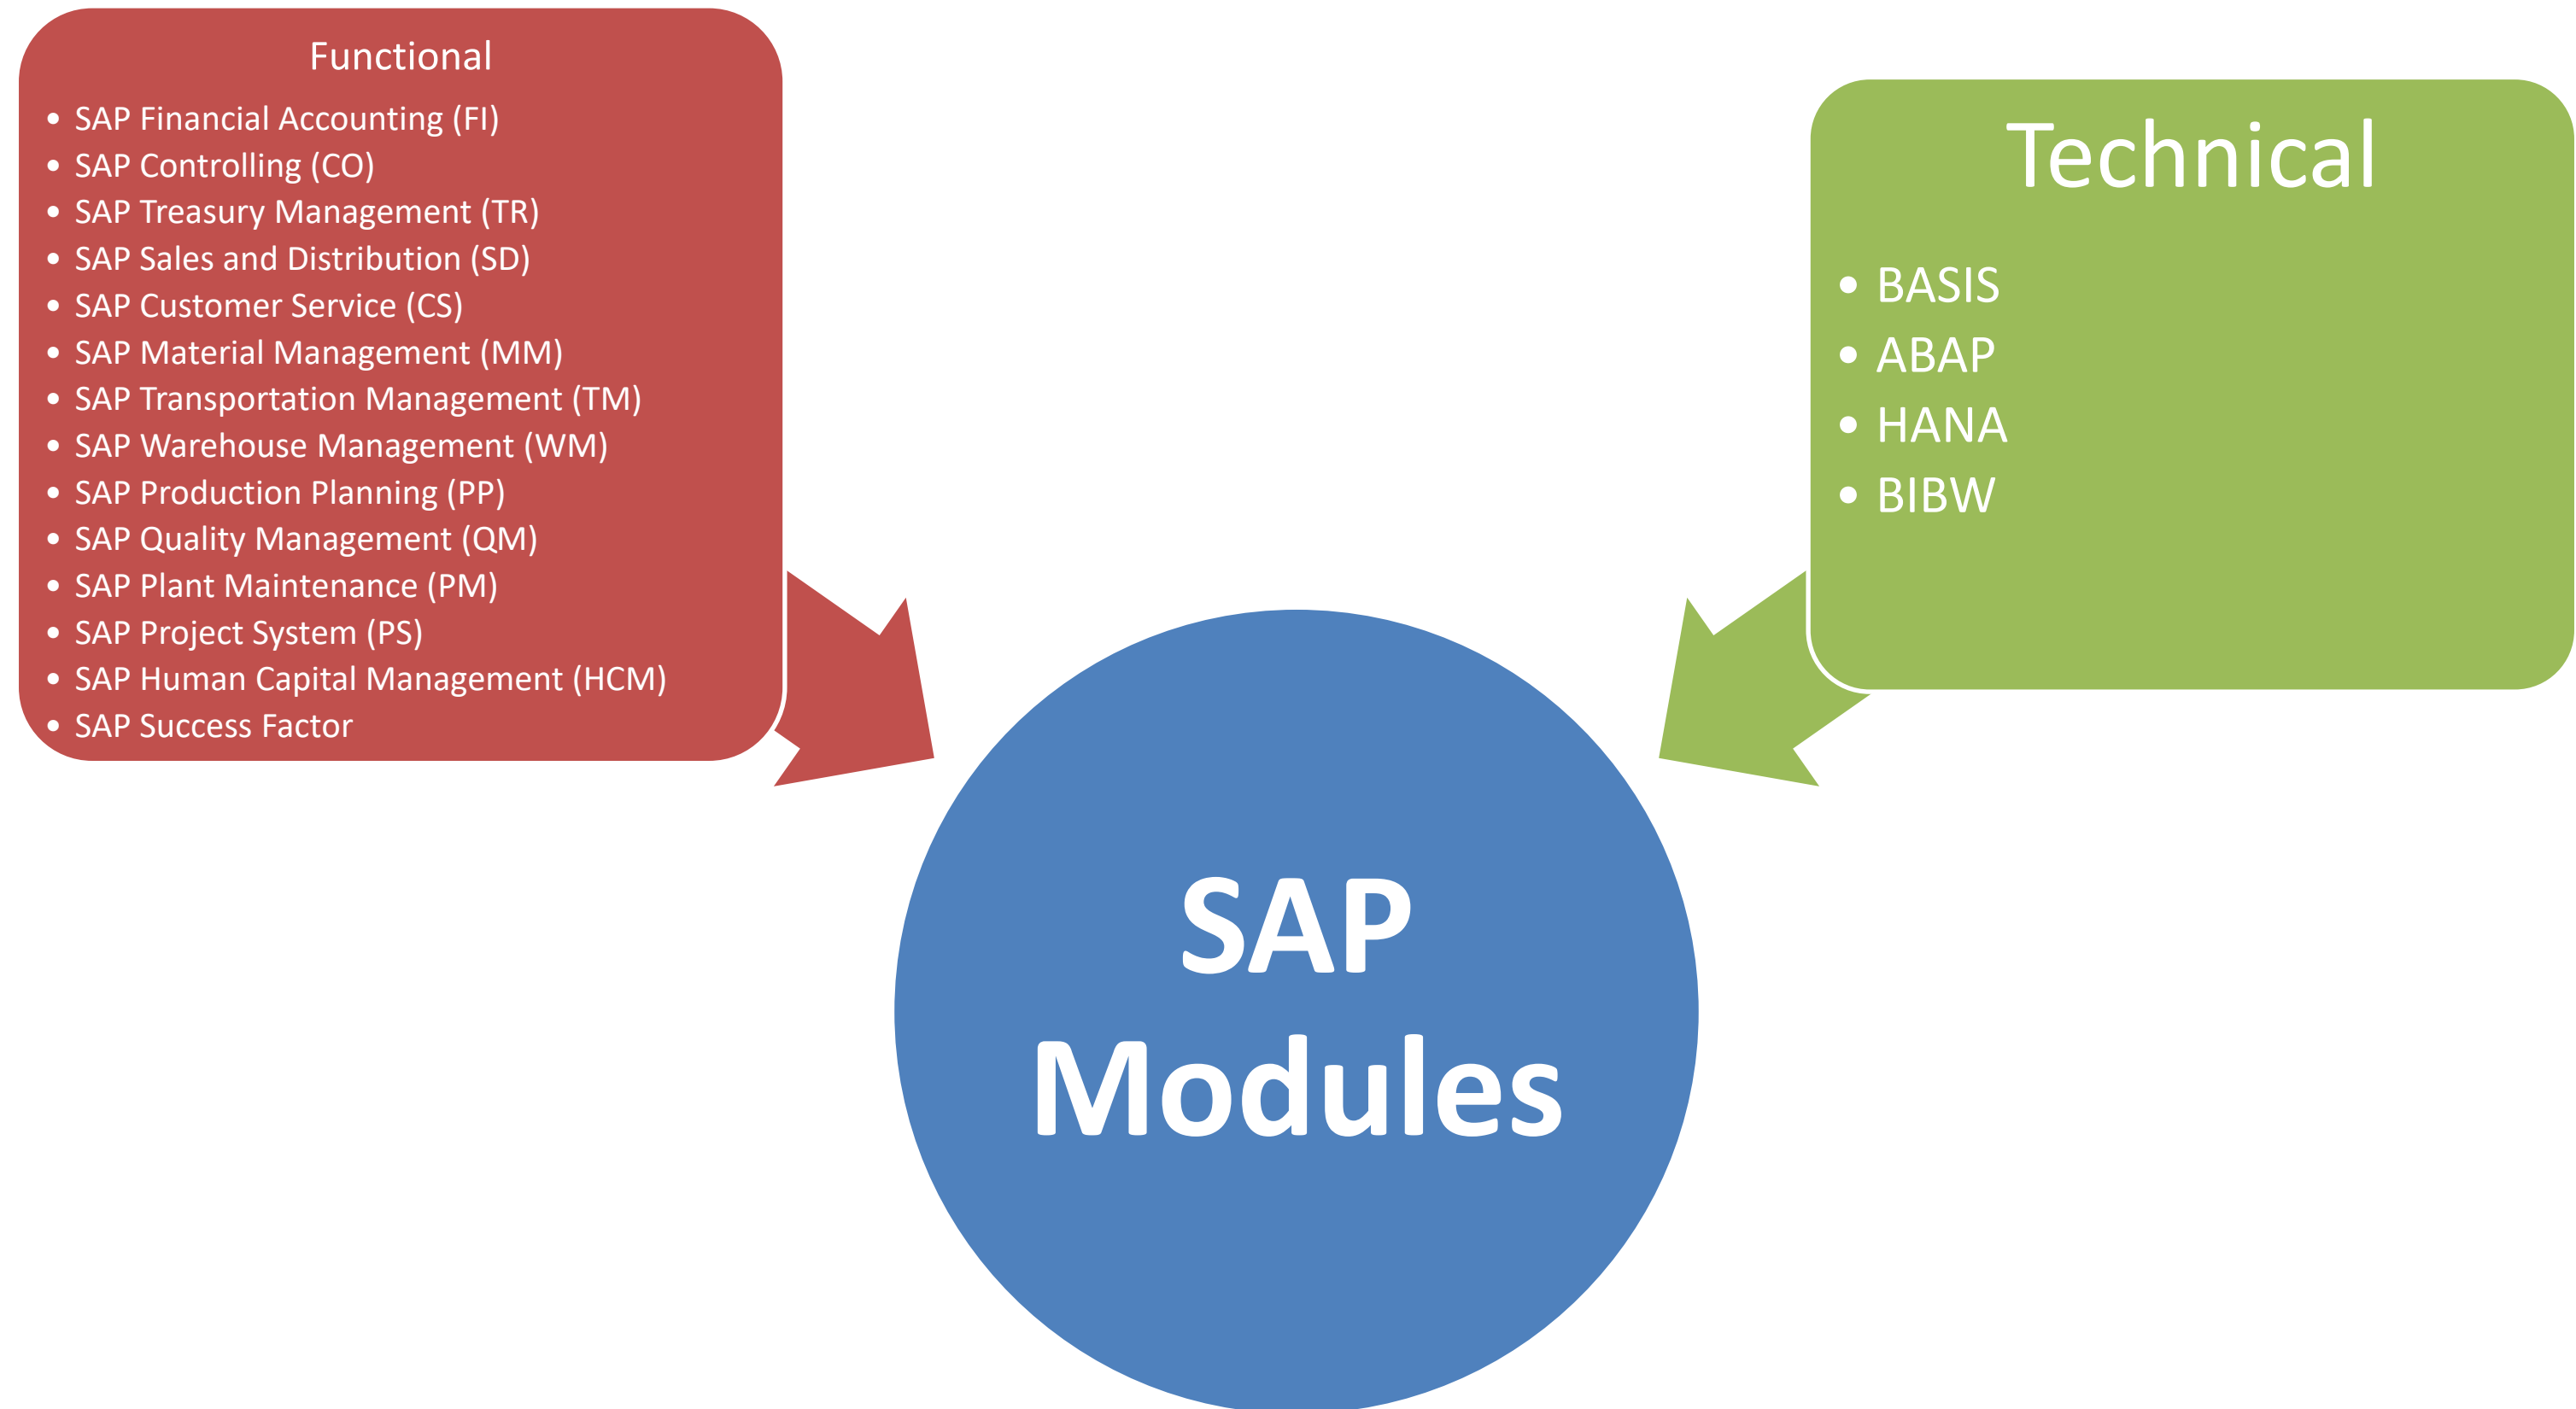

### The opportunities for your organisation per solution – innovate and improve

- ★ Cloud delivery model resulting in a low and predictable TCO
- ★ SAP Ariba SNAP! best-practice implementation within 12 weeks
- ★ Process 35k+ invoices annually per FTE with the Ariba Network
- ★ No training necessary with SAP Ariba 'Guided Buying'
- ★ Innovations are automatically delivered to you monthly

- ★ Cloud delivery model resulting in a low and predictable TCO
- ★ Standard digital communication with suppliers (Ariba Network)
- ★ Integration with SAP Ariba Sourcing & Discount Mgmt.
- ★ Process 35k+ invoices annually per FTE with the Ariba Network
- ★ Embedded Catalog Buying in S/4HANA via the BeNeering Cloud

- ★ TCO reduction with the SRM OneClient (SRM on top of ECC)
- ★ Improve the usability with SRM UI5 and SAP Fiori apps.
- ★ Embedded Catalog Buying in SRM UI5 and BeNeering Cloud
- ★ Digital communication with suppliers via the Ariba Network
- ★ Process 35k+ invoices annually per FTE with the Ariba Network

- ★ Improve the usability with SAP Fiori apps.
- ★ Improved usability and Catalog Buying with the BeNeering Cloud.
- ★ Digital communication with suppliers via the Ariba Network
- ★ Process 35k+ invoices annually per FTE with the Ariba Network

# SAP MM Module Content

Reports

Configurational Data  
( Consulting )

Transactional  
Data

Master  
Data

## Unit 1: Enterprise structure

- Define Plant
- Define Storage Location
- Define Purchasing Organization
- Assign Plant to Company Code
- Assign Purchasing Organization to Company Code
- Assign Purchasing Organization to Plant
- Defining Valuation Area
- Defining Regions

## Unit 2: Logistics General & Materials Managements

- Defining Purchasing Group
- Defining Attributes for Material Types
- Defining Number Range for Material Types
- Defining Field Selection For Material Master Data
- Configuration of Vendor Master Data & Business Partner
- Defining Number Range for Purchase Order
- Defining Number Range for RFQ
- Defining Number Range for Contract
- Defining Document Type for Purchase Requisition
- Defining Document Type for Purchase Order
- Defining Document Type for RFQ
- Defining Document Type for Contract
- Defining Condition Types
- Defining Calculation Schema
- Defining Schema Group
- Defining Schema Determination
- Configuration of Release Strategy
- Valuation and Account Determination
- Movement Types
- Split Valuation
- Batch Management
- Define Unit of Measures
- Define Stock Determination
- Serial Number Activation
- Master Data Migrate

Make MRP

# SAP Users

SAP End User

SAP Key User

SAP Consultant Functional Module

SAP BASIS

SAP ABAP

# Work tasks for SAP Basis , SAP ABAP , SAP Consultant And SAP End User

- **SAP Basis** responsible for the SAP software runs , system maintenance, system updates , configuration of the SAP system.
- **SAP ABAP** responsible for the programming language which used to develop custom applications for the SAP system such as create custom reports, interfaces and other functionality that is not available out of the box in the SAP system.
- **SAP consultant** responsible for Master data , configuration operations and support to Key Users to solve the problems.
- **Key Users** support to End Users to solve the problems.
- **SAP End User** responsible for the direct operations needed for business

## Types of Projects in SAP

SAP Implementation

SAP Support Project

SAP Upgradation

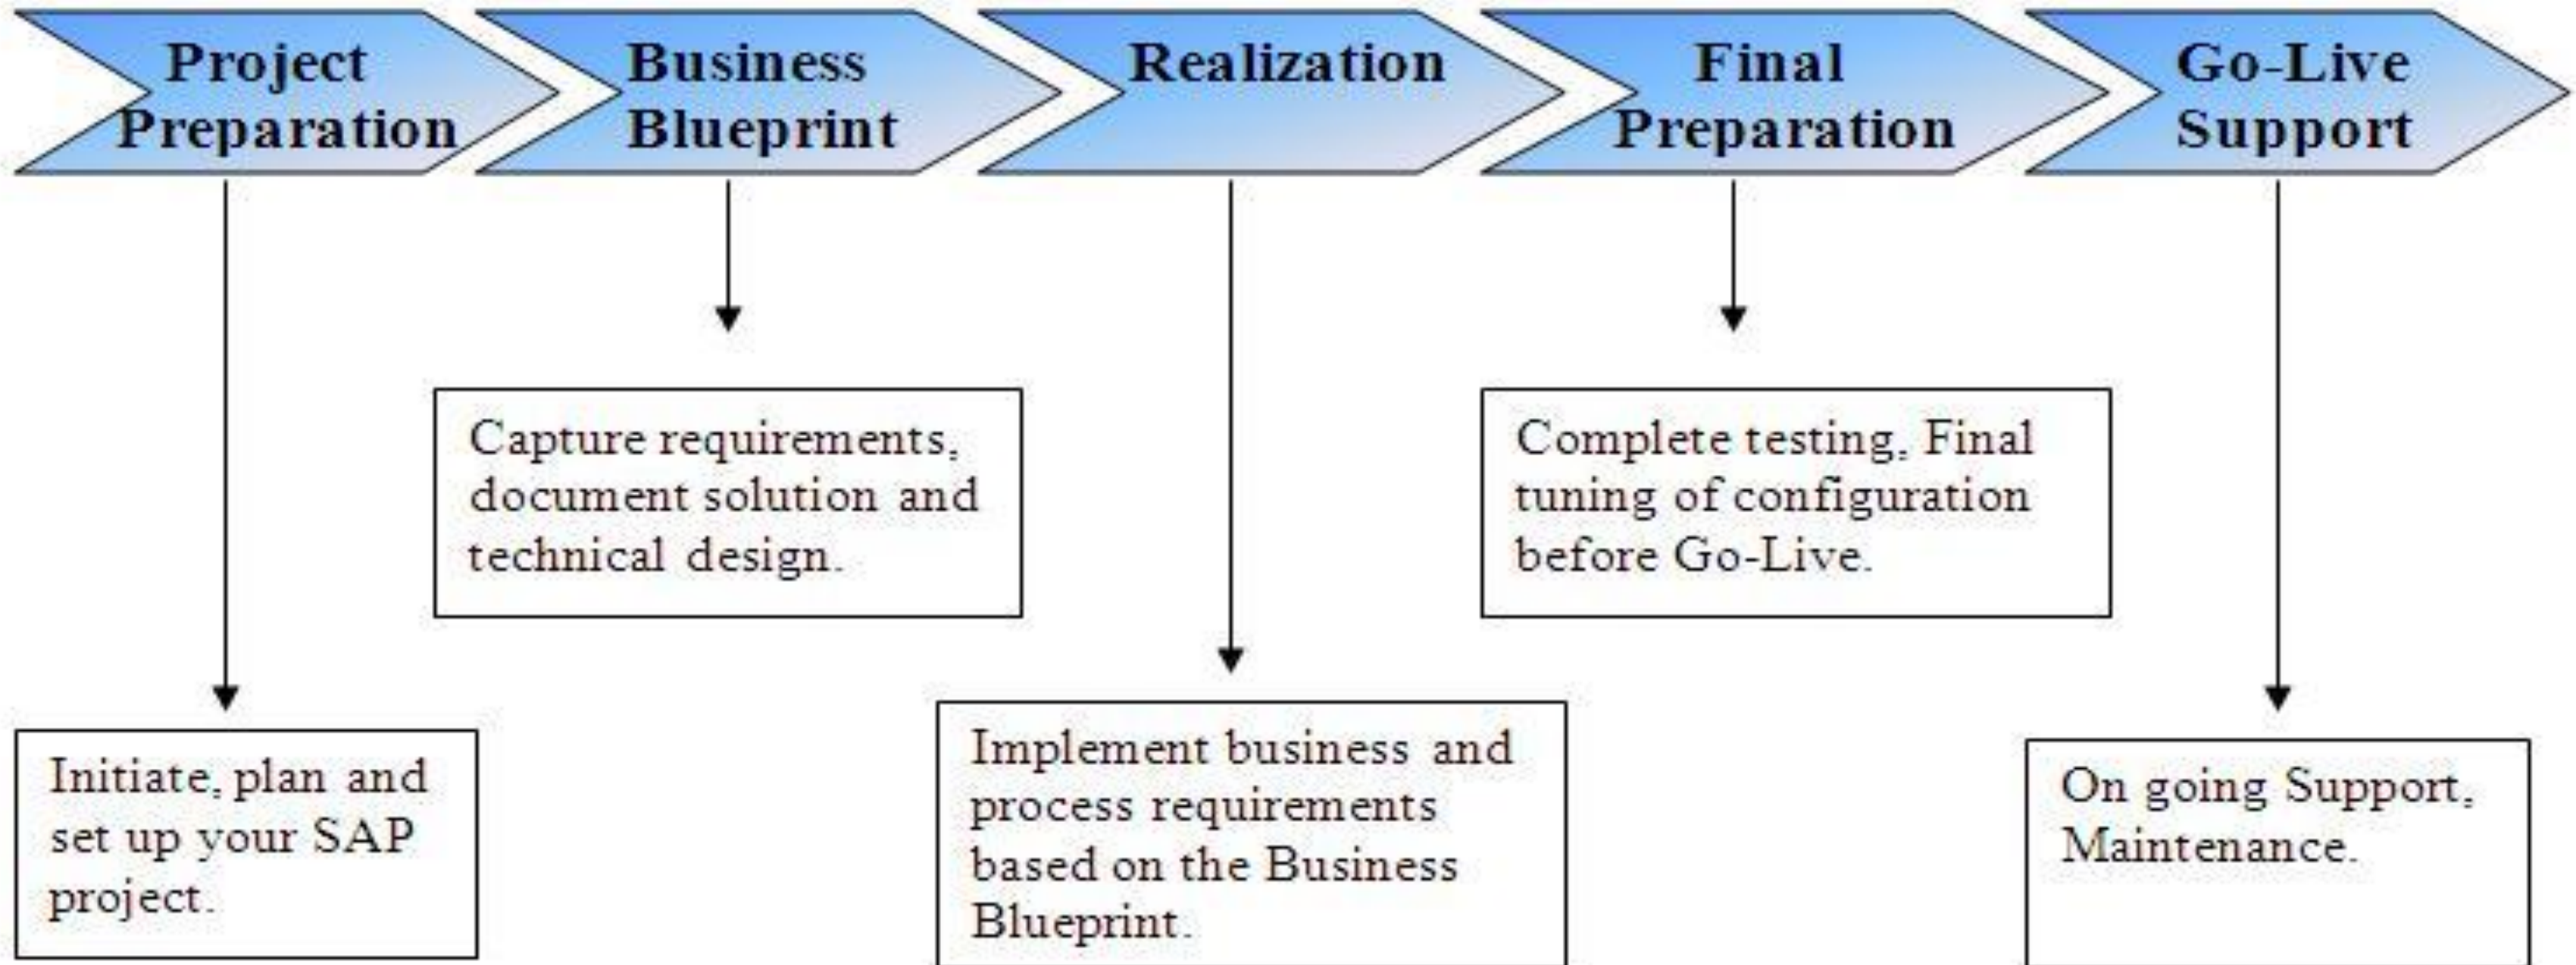

SAP Rollout

- ▶ **SAP New Implementation Project**
  - ▶ Also called : Green Field Implementation
  - ▶ Company has another ERP system or has no ERP System and wants to implement SAP
- ▶ **SAP Roll-out Project**
  - ▶ Company already has SAP but needs to add a new Company or plant to the system
- ▶ **SAP S4/HANA Conversion Projects**
  - ▶ Also called: Brown Field Implementation
  - ▶ Company has SAP ECC and wants to convert it to SAP S4/HANA system
- ▶ **SAP Support Projects**
  - ▶ Company already has SAP and want to support daily business process or activate new functionalities
- ▶ **SAP Upgrade Projects**
  - ▶ Company already has SAP and want to upgrade from SAP S4/HANA 1709 to S4/HANA 2020

# ***SAP implementation Methodology***

- ***For SAP ECC - The Recommended Methodology is **ASAP** --  
**Accelerated SAP*****
- ***For SAP S/4hana - The Recommended Methodology is **SAP**  
**Activate*****

# ASAP Methodology For SAP ECC ( Old )

# ***initial Preparation***

## ***Project Management Related Activities***

- ✓ ***Create The Project Plan***
- ✓ ***Define Project Members And Contacts information***
- ✓ ***Kick-Off Meeting***
- ✓ ***Book Meeting Rooms***
- ✓ ***Explain Project Plan To Business Key Users Or Department Managers***

# ***Business Blueprint***

➤ ***Consultant hold Meeting With Business Key Users And Decision Makers in Order To Understand The Daily Business Process And Other Requirements***

➤ ***After The Agreement With Business ,The Blueprint is Ready***

***Now With :***

- ✓ ***Which Business Process Will Be implemented***
- ✓ ***What is The Configuration Needed***
- ✓ ***What is The Developments Needed***

# ***Realization***

- ***The Functional Consultants Will Start Configure The System For Each Module***
- ***The Technical Consultants Will Start The System Customization/Developments***
- ***The Functional Consultants Will Start The Unit Testing For his Module***
- ***After All Modules Finish Configuration And Customization , Now is Ready An SIT ( System integration Test ) Should Be Started***

# ***Final Preparation***

- ***SAP Consultants Will Show The Ready System To Business Users And Fine-Tune The System if Needed***
- ***SAP Consultants Will Give Training To The Business Users***
- ***SAP Consultants Will Provide Test Scripts To Business Users***
- ***Business Users Will Start Testing The System (UAT – User Acceptance Test )***
- ***Preparation Of Go-Live Will Start***
  - ***Define Data To Be Migrated ( Templates And Records )***
  - ***Define Cut-over Activities***

# ***Go-live And Support***

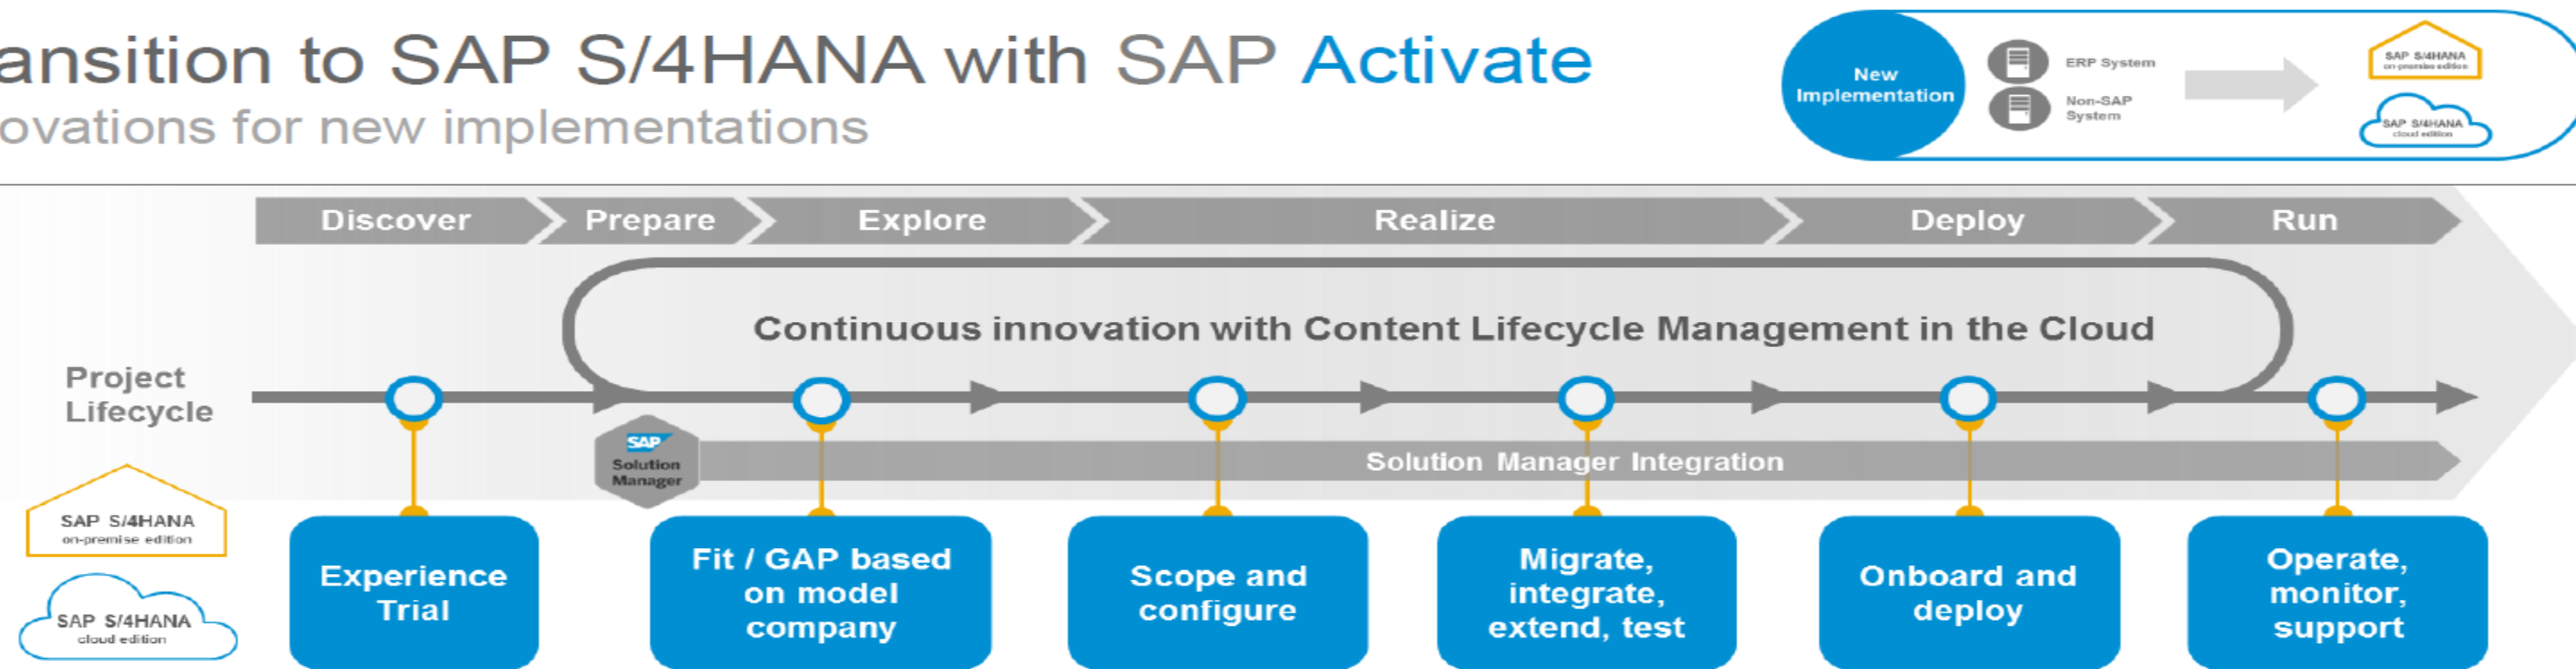

- ***The Project is Live ( Go-live )***
- ***Cut-over Activities will be Done On Live By Business Users And Consultants***
- ***Business Users Will Start Using The System in The Their Daily Business Process***
- ***SAP Consultants Will Support Daily Business Process And Solve issues***

# SAP Activate Methodology

## Transition to SAP S/4HANA with SAP Activate

Innovations for new implementations

### Innovations delivered with SAP Activate

- Pre-configured trial systems – role based self-led evaluation of SAP S/4HANA utilizing SAP Fiori
- Start your project with ready-to-run business and integration processes delivered with the product
- Fit/Gap analysis instead of costly blueprinting with business process documentation delivered through Solution Manager 7.2
- Pre-defined data mappings for data migration
- SAP Fiori based learning application with role-based learning content
- SAP Solution Manager as delivery infrastructure
- Content Lifecycle Management for cloud deployments using self-service and expert configuration tools

# ***Difference Between SAP Activate And ASAP***

➤ ***ASAP Use Waterfall But S/4hana Use Agile Methodology***

➤ ***Discover***

***SAP New Features***

➤ ***Realize***

▪ ***SAP Business Users Can Participate And Give Feedback With Regular Standup Meeting***

▪ ***Scrummaster ( Mini Project Manager ) Can Monitor The Progress Using Sprints***

➤ ***Deploy***

***Pre-delivered Master Data And Transactional Data Templates Are Available***

# ***SAP MM Consultant Tasks***

- ***Project Start*** ***----- Implementation ( Collecting Data Configuration Integration Key Users Training***
- ***After Delivering Project And Taking UAT (Users Accept Test)-***  
***--- Support***

# ***SAP MM Consultant Tasks in Detail***

- ***Responsible For MM Master Data***
- ***Responsible For MM Configuration Integration***
- ***Responsible For MM Key Users Supporting***
- ***Involve To Improvement SAP System According To Customer Request***

# ***The Important Customers To SAP MM Consultant***

- ***Supply Chain Departments***

***1- Stock Controller Or Material Planner Or Material Controller Dept***

***2- Production Planning Dept***

***3- contracting Dept***

***4- Purchasing Dept***

***5- Warehouses Dept***
